

## JUBILEE JUMP

### Tandem Skydive

The tandem skydive is the most popular of all skydives and is perfect for someone new to this adrenaline filled activity. You'll be strapped to a fully qualified instructor who will do all the work, leaving you to enjoy the view!

### The Jump

At 10,000 ft in the air and strapped to your fully qualified instructor, you will begin your descent into pure open sky. As you exit the aircraft, you dive straight into an incredible 30-40 seconds of freefall time, soaring through the sky at a rapid speed of approximately 120mph.

### Canopy Deployed

At 5,000 ft your canopy opens, and the beauty of the landscape surrounding you suddenly comes into view. The high-octane thrill of the freefall now becomes something more relaxed and inspiring, floating through the sky as you slowly descend.

### The Landing

You've done it! All the euphoria and bliss of the tandem skydive will rush through you at this point. You're back on dry land and you've completed a truly incredible experience.

### FAQs

Due to the nature of this activity I'm sure you have many questions. The link below will take you to the Skyline Skydiving website where you can find all your answers, including the costs involved and how your sponsorship money is broken down.
