ILLITERACY DOESN'T MAKE SENSE

480 million women
around the world
can't read or write.

Did you know that educating women changes the world?

Empower her: to register the birth of a child, read a medicine bottle, open a bank account and gain independence.

If you believe women should have the literacy skills to transform their own lives, join us.

Sign up to our campaign today and together we can put women's education on the global agenda.
